Dear Shri Jaiswal,

I have gone through the article published in "Process & Plant Engineering" dealing with the rehabilitation of our Kandla Plant which was devastated during the earthquake. With the active support of PDIL team, all the Plants were commissioned within three-and-a-half months, which is commendable feat. PDIL has indeed brought out innovative methods of repair of damaged structure like pressure grouting, FRP wrap to name a few. We appreciate the way PDIL responded at a very short notice and were with us in the hour of crisis. *I also remember those nostalgic days.*

With best wishes,

Yours sincerely,

(U.S. Awasthi)

Shri B.K. Jaiswal
