Dear *Dr. Ravi Kanth - Ji,*

With reference to PDIL letter PDN/CMD/6.5 dated 7<sup>th</sup> Aug, 2012, we would like to state that MFL has already collaborating working with PDIL.

MFL is in the process of Feedstock conversion from Naphtha to Natural Gas. The Basic Engineering Design Package (BEDP) was already completed by Process Licensor, M/s.HTA/S, Denmark. PDIL was engaged as the Engineering consultant for the above project and also for installation of Naphtha Deaerator in the present Ammonia Plant. Regarding restoration of our NPK operations, PDIL was engaged to do the Structural Analysis and recommend suitable remedial measures.

The worth mentioning Project that PDIL has done for MFL is the Rehabilitation Study Report of MFL Plants which has started yielding the desired results.

MFL is well aware of the capabilities and the expertise of PDIL in the Fertilizer Industry and it is sure that MFL will work together with PDIL in the years to come to fulfil the PSUs Social and Industrial responsibilities.

*With warm regards*

Sincerely yours,

**Dr I VIJAYAKUMAR**
